## programming

react  
AWS (Cloudfront,  
Lambda/SNS/SQS)  
C#  
monadic/functional  
concepts  
git  
postgres  
jquery  
html/css  
nodejs

## experience

- Jul 2022 - **Senior Software Developer** Thred  
Own and maintain front end architecture.  
Coordinate cloud resources to deliver assets to client.
- Mar 2021 - Jun 2022 **Software Developer** Crowdstreet  
Facilitated departmental learning by leading Typescript workshops.  
Increased incremental delivery by designing a backend flag system.  
Participated in architectural discussions for integration features.
- Jul 2018 - Feb 2021 **Software Developer** Navex Global  
Reduced department development time by standardizing ReactJS patterns.  
Created platform-wide libraries allowing efficient, readable, and correct code.  
Increased backend api stability with C# monadic architecture and BDD.  
Owned agile epics, scoped stories, and coordinated teams to meet deadlines.
- 2018 - **Owner | Developer** Code Solutions, LLC  
Drove client sales + traffic with responsive, Material Design single-page apps.  
Scaled out business by managing small Designer/Developer pairs.  
Created storefronts via AWS serverless APIs using ReactJS + Python.  
Aligned product creation with client needs through clear communication.

## projects

- Aug 2018 **Internet Rover** Bootcamp Project  
Built a rover using a Raspberry Pi and allowed piloting through my web site using an API written using NodeJS and Postgres.
- July 2018 **Front End Game** Personal Project  
Designed and implemented a reimagined, scalable version of the popular mobile game 2048. Used jQuery, javascript, html, and css.

## education

- 2014-2016 **Washington State University**  
Studied data structures, algorithms, and computer science fundamentals.
- 2018 **General Assembly** Web Development Immersive  
Studied web development. Including NodeJS, Django, React, jQuery, Postgres.
